

Auberge' Exterior Color and Material Worksheet
Exhibit #1 to Application for New Home Construction

Exterior paint, brick, stone, and other materials used on houses in The Auberge' are all important for maintaining the overall continuity of the community. In that regard, all owners are required to submit a complete list of exterior colors and materials that they propose to use on their houses.

The purpose of the color scheme that was implemented in The Auberge' was to provide for a blending of colors and materials. Exterior colors that are bright or offer great contrast are discouraged and will not be approved. The below listed color combinations are installed at the addresses indicated. They may be selected for use by any owner or builder, but are by no means the only ones available. Any combination of stone, brick, or paint materials is acceptable as long as they blend into the overall theme of the community.
